COUNTY OFFICES TO BE OPEN FOR BUSINESS ON WEDNESDAY

County Facilities to be Evaluated to Ensure Safety of Employees and Public

San Diego County offices will be open for business on Wednesday, Oct. 29.

However, all County facilities will be continually evaluated by department heads on a building-by-building basis to ensure the safety of employees and the public. It may be necessary to close some facilities if conditions warrant. The public is advised to call before coming to any County facility.

The welfare of employees will be considered at all times. Accrued sick leave may be used by employees in the event of particular respiratory or other health related conditions.

Conditions are fluid; any dramatic change in conditions could result in a re-evaluation of the current plan.

In times of crisis, it is important that County government be open for business. The County will continue to serve the public during this difficult time.
